

## NO JOB IS TOO SMALL - LIGHTER MODEL WITH GREATER MOBILITY FOR SMALLER AREAS AND UPPER LEVEL FLOORS!

The **MS-355** is the smallest and most compact addition in the Masterscreed range. It offers greater mobility and is lightweight, whilst providing customers with the same quality as the other models. It has been designed specifically for smaller application and upper level floors and single and double rebar mesh. Now no job is too small for accurate laser precision levelling!

Easy set up, operation, cleaning and transportation makes the **MS-355** a valuable asset to any concrete business,
